Memo/Note

Subject	From	Reference	Tienen,
GHS LABELLING			May 2010

RE: GHS regulation (EC) n° 1272 / 2008 on classification, labeling and packaging of substances and mixtures and REACH regulation (EC) n° 1907 / 2006

Following the new regulation (EC) 1272/2008, we shall implement new labels in compliance with GHS standard for labeling of substances and mixtures.
By December 1, 2010 we will have implemented GHS labels on all our product forms of citric acid (E 330).

The essential changes of the new GHS labels concern:

- globally harmonized criteria for the classification of physical, toxicological, and environmental relevant properties.
- globally harmonized criteria for hazard communication: hazard classes, hazard categories, hazard pictograms, signal words, hazards statements (H) and precautionary statements (P).

LABELLING	**NEW**	**OLD**
Signal word	warning	irritant
Hazard Pictogram		
Hazard statement	H319	Risk phrases (R – R36)
Precautionary statement	P264 P280 P305 + P351 + P338 P337 + P313	Safety phrases (S)

In line with the changes and the redesigned GHS labels we shall also issue new Material Safety Data Sheets (SDS). These new SDS shall be available as soon as the first deliveries shall be shipped with the new GHS labeling.

Beate Braeuer
DSCM Manager
